NOW IS THE TIME.

The hot weather is never appreciated until it talks to one with its own burning eloquence. But while the fierce best of these days is making us swelter, we know what it means. It would be a good thing for the parched citizen as he harries to a soda-water fountain to slake his thirst to poor tenement-house room.

As he takes off his light straw hat to let the wind play upon his perspiring fore- same Grass, this, who was lately "out in head, will be not feel like contributing to the cold" in the Thirteenth District. are on us now and how taxing they are quotations. with every means to alleviate them and sound health with which to face them. Think, then, of theltiny dwellers in poverty's abodes, stricken with illness as well the players. as heat, and with no means to supply themselves with relief save what the charity of warm-hearted men and women gives to them. Think of this and then send your con-

tribution to help on this beautiful work.

M'KINLEY DAY IN OHIO.

It is Convention day for the Ohio Republicans. It is also, so far as indications go, McKinley day. All is barmonious as can be as to the head of the ticket to be nominated, and *McKrsuzy and Protection" will be the watchwords of the party in the State. The fight will be on McKinler's part, however, as much for personal vindication and consolation, since he lost in the Congressional race last Fall, as it will for party victory. He can be depended upon to lead a very vigorous assault, and there will be no opportunity for napping on the side of his principal opponents.

Since the tariff-tinker's nomination is sure, the chief interest in the Convention proceedings will hover about the Sherman-Foraker fight over the Senatorship. SHEEMAN was early on the ground, silent and watchful, coolly planning to capture the Resolutions Committee, through which body he hopes to get a recital of his services, and so have the better of his fiery rival. There will be a hot protest by the Foraker element against any Sherman resolutions, and a rattling fight is to be

TIME TO KEEP COOL.

The country rises in all unanimity to declare that these days are hot. The statisticians arise at the same time with the data to prove that they are even hotter than the country thought. At such times it seems like a piece of impertinence to offer the old admonition: "Keep cool." Yet that is the very best advice for the occasion, and the very best thing to do.

It won't put out old Sol's fire to get excited over it. If you have remarked to your neighbor that it is a hot day, you have done your outy, so far as the weather is concerned. The fact exists. You have made known your recognition of it. You can't change it. Accept it. then, and go about what business you have as quietly as if there were ice instead of warm water in the fountain in City Hall Park. Don't fuss yourself into a sunstroke, nor cold-water yourself into the shadow of a premature grave. Many ex-
